SUMMARY

Detail-oriented Information Technology student with strong skills in Python, SQL, Excel, Power BI, and Data Analytics. Experienced in developing web-based and database-driven projects with knowledge of data visualization, problem-solving, and software development. Seeking an opportunity to apply technical and analytical skills in real-world IT projects.

PROJECTS

Online Election System 2026

- Developed a secure Online Election System using Python, HTML, CSS, and MySQL for digital voting management.
- Implemented user authentication, voter registration, and secure vote casting features.
- Designed a database to manage voter details, candidate information, and real-time voting results.

Student Management System 2025

- Developed a Student Management System using Python, MySQL, and basic frontend technologies to manage student records efficiently.
- Implemented features such as student registration, attendance tracking, result management, and data updating.
- Designed and integrated a database for secure storage and retrieval of student information.

Personal Portfolio Website 2024

- Developed a responsive Personal Portfolio Website using HTML, CSS, and JavaScript to showcase skills and projects.
- Designed a modern and user-friendly interface with mobile-responsive layout and smooth navigation.
- Integrated contact form, project section, and social media links to enhance the website.
